(54) Title: AIR PURIFIER AND VOLATILE LIQUID DISSEMINATOR

(57) Abstract: An apparatus adapted to both purify an air flow passing through it and disseminate a volatile liquid therein, comprising a source of volatile liquid, a disseminating element for the liquid and a catalyst adapted to remove pollutants at relatively low temperatures, the aforementioned elements being arranged such that the air flow encounters first the catalyst and then the disseminating element. The apparatus is useful, for example, for purifying air and adding fragrance thereto.
